

Rivis: Share and Connect Your Thoughts

by Yuxiang Sun, Jing Zhou, Vorapa Vorapanya

Design for Emergency
Seed ideas

To share your thoughts, reflections and emotions
To connect with people of shared interests

To connect people from around the world to express their thoughts on this special period of time and connect based on their shared interests. There are 3 main features for this application. First, you can express your thoughts with words or media contents. Key words will be automatically generated and stored as a database. You can keep track of your emotions. Second, you can choose your threads of thoughts to be visible to others, and you'll see other's threads of thoughts by hashtags of themes of your choice. Such as environmental impact, policies, healthcare situations, etc. There will be a special section dedicated to the current situation of COVID-19 in your city and the world. Last but not least, chat rooms will be created based on keywords often appeared in the database. You will be invited to and join chatrooms of different themes and interests and exchange your thoughts and experience with new people. The system will also connect you to people of similar interests based on keywords database.

WHOM IS IT FOR?

For those who want to record their thoughts and emotions during this special period of time and also share and connect with new people around the world.

WHY IS IT RELEVANT?

During this relatively isolated and slowed-down life period, we have extra time to reflect on our lives, and on different aspects of what's going on in the world. From the survey we know that many people in each age range fall into negative feelings during this situation and try to make sense of their days. We want them to feel meaningful by voicing out their thoughts, feel connected by seeing and discussing shared thoughts.

WHAT IS NEEDED TO IMPLEMENT THE IDEA?

- Key words detection
- Data platform
- Mobile application
- Chat room and comments real-time system
- Privacy and security system

WHO CAN CONTRIBUTE?

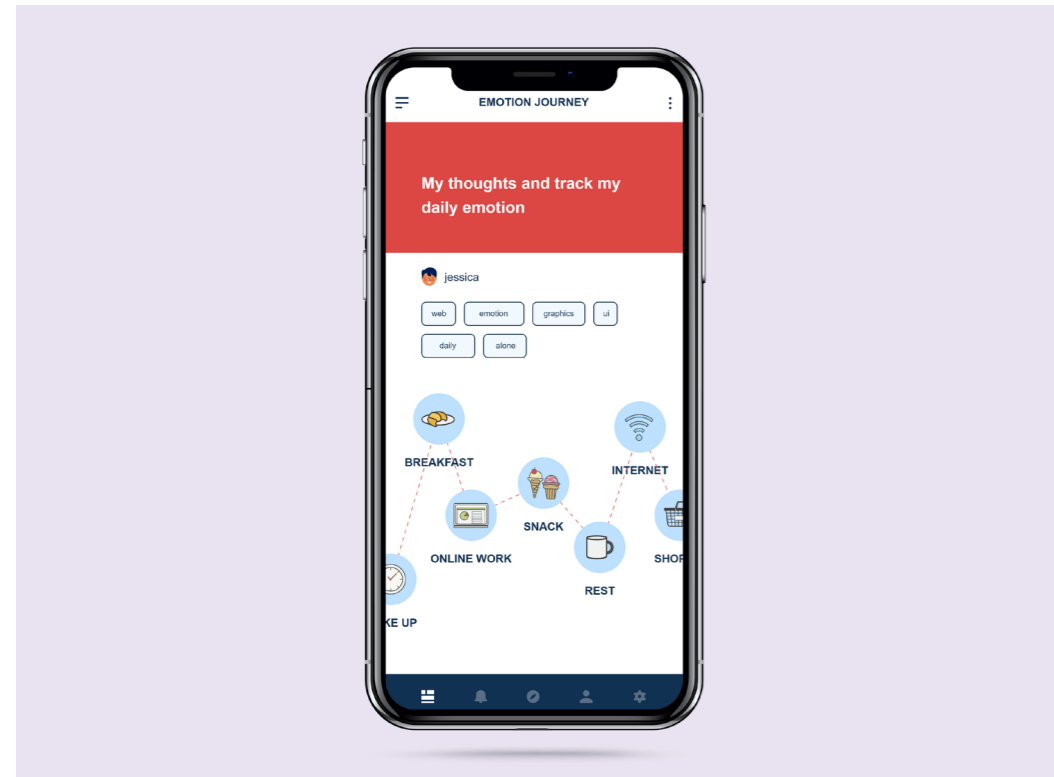

- UX/UI designer
- Mobile apps developers
- Strategist
- Marketing team
- Data analyst

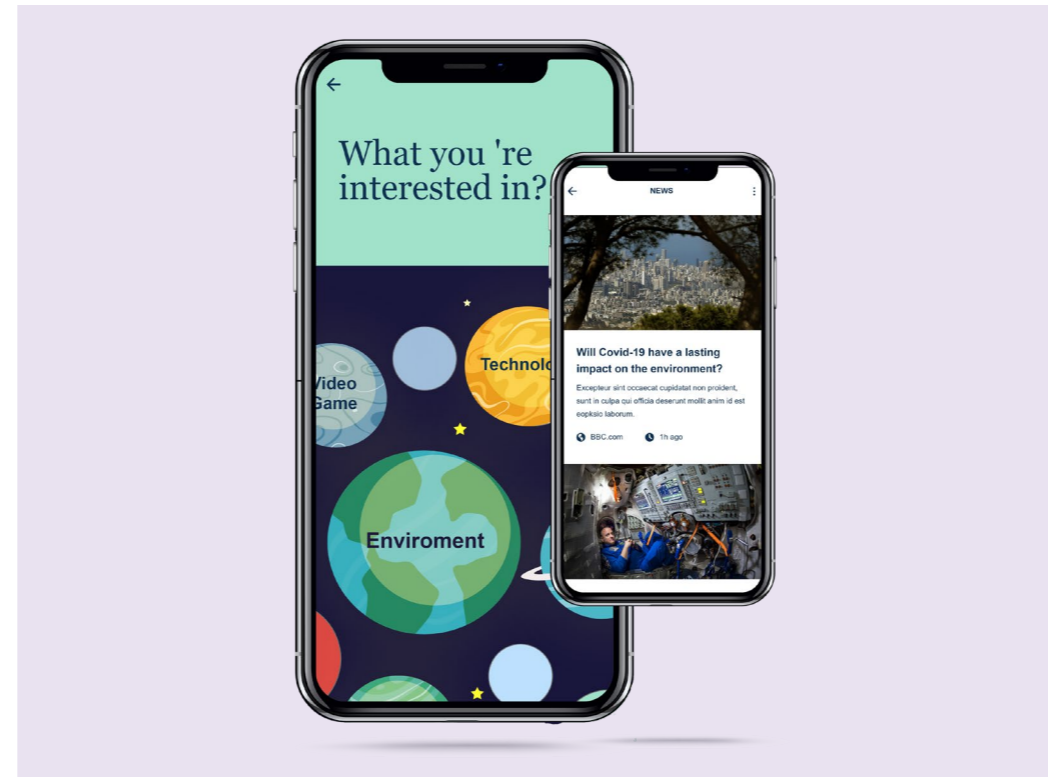

Rivis: Share and Connect Your Thoughts

Profile page - Write threads, express your thoughts and feelings, and keep track of your emotions. Keywords will be detected and automatically generated so other people can interact by commenting on your thought threads depending on their choice of interests.

Main page - Choose your interest once you register to the application, it will decide what kind of threads from others you can see. and you can keep up-to-date with the news of COVID-19 situation around the world.

Chat room - Chat rooms of different themes are created based on the database of keywords, such as environmental impact, policies, time-management, remote working and so on. You'll be invited to chat rooms of your chosen interests. Share your experience and discuss with people around the world. The system can automatically find you new friends to connect with who share similar key words based on keywords matching.
